

We're Returning to Your Area!

We would greatly appreciate your help in announcing our workshops to others who may have a need for, or interest in, this type of training. Thank you for your support of our programs!

Dr. Keith Amass and Staff
Safe-Capture International

PO Box 216 • Snohomish, WA 98291 • USA

Current
U.S.
Schedule
Inside!

Over 90% of our workshop participants rate our training programs "excellent"—many stating this was "the best workshop they had ever attended!"

Attention Previous Attendees!

Get the latest revised and updated information, our new 2017 manuals, and a special refresher registration fee for any program you've previously attended.

Setting the Standards in
Chemical Immobilization
Training for Over 25 Years

Internationally Acclaimed
We've trained over 11,000
professionals in the US, Canada,
Europe, Asia, and Africa.

An Exceptional Learning
Opportunity For:

- Law Enforcement
- Animal & Rabies Control
- Humane & Animal Rescue Personnel
- Disaster Preparedness

Returning to a Location Near You With Our 16-Hour Chemical Immobilization Workshop!

Chemical Immobilization of Animals

Current U.S. Schedule Inside

This is Safe-Capture's
Internationally Acclaimed 16-Hour
Chemical Immobilization Workshop!

Chemical Immobilization of Animals

Multimedia Lecture Presentation and Discussion

14 Hours

- Custom drug combinations and formulations which minimize induction times—the time from dart impact until the animal is immobilized. (Dr. Amass has drug combinations and techniques that will safely and rapidly limit the escape potential of most animals within 64 seconds to 3.5 minutes).
- Proper injection sites to ensure rapid drug absorption and effects.
- Capture strategies to minimize capture stress on the animal, and procedural stress of the operator.
- Drug delivery technology: Advantages and disadvantages of the various commercially available darting systems including Pneu-dart, Telinject, Daninject, Palmer, Paxarms, and Distinject. Choosing the system to best fit your needs—maximizing the utility of the projector you already have.
- Techniques for sighting in dart projectors to ensure accurate, atraumatic dart delivery.
- Practical, field-tested modifications necessary for accurate and consistent results with currently manufactured darting systems and radiotracking devices.
- Drug and dosage recommendations: The latest in safe, practical, and reliable species-specific and scenario-specific drug and dosage recommendations for feral dogs, feral cats, escaped domestic livestock, urban wildlife, and exotic animals. We will also discuss “in-shelter” techniques for less distressful animal handling and pre-euthanasia applications, as well as techniques for rapid, safe, and quiet incapacitation of guard dogs.
- Dosage calculation
- How to re-dose animals incompletely immobilized on approach.
- “Superconcentrated” drugs: Where to obtain and how to use them to give you a faster knockdown, and allow you to use smaller, less traumatic darts.
- Post Immobilization Care of Animals: How to ensure the correct level of immobilization for an approach which affords operator safety and minimizes stress to the animal. Proper species-specific positioning, techniques of dart removal, and dart wound care.
- Medical monitoring: Assessment techniques to ensure the immobilized animal stays physiologically stable throughout the procedure. You'll learn how to monitor and interpret temperature, pulse, heart rate, respiratory rate, capillary refill time, pulse oximetry, capnography—with checklists provided to help keep you organized and on track in the field.
- Medical emergencies associated with capture and handling: How to prevent, recognize, and treat bloat, capture myopathy, shock, hyperthermia, hypothermia, seizures, and other complications which can be avoided and managed in association with chemical immobilization.
- Accidental human exposure to immobilizing medications: Which drugs are dangerous to humans? What can you expect with accidental human exposure? Standard Operating Procedures to prevent human exposure to immobilizing drugs. How to coordinate with your physician and local poison control to develop protocols should an accidental exposure occur.

Hands-On Lab/Practice

2 Hours

- Safe Handling and Use of Immobilization Darts: Assembly, loading, unloading, and cleaning of the various brands available in the US.
- Use of Safety Equipment for Prevention of Accidental Exposure to Anesthetic Drugs
- Safe Handling and Use of Short and Long Range Dart Projectors including CO₂, Air, and 22 blank powered projectors
- Practice and Development of Proficiency with:
 - Pole Syringes
 - Blowgun Delivery of Anesthetic Darts: Even if you have never used a blowgun before, you will leave this portion of the program accurate and proficient with this safe, inexpensive, and atraumatic technique of dart delivery.
 - Radio-Tracking Darts for efficient location of animals and retrieval of lost darts.

www.safecapture.com

Chemical Immobilization of Animals

Louisiana: Baton Rouge: LSU School of Veterinary Medicine: Feb 7-8, 2017

Georgia: Athens: UGA Veterinary Medical Learning Center: Feb 18-19, 2017

Tennessee: Gatlinburg: American Legion Hall: Feb 22-23, 2017

Missouri: Saint Joseph: Missouri-Western State University Dept. of Biology: Mar 13-14, 2017

Arizona: Phoenix: AZGFD Ben Avery Facility: Apr 5-6, 2017

North Carolina: Raleigh: Wake County Law Enforcement Training Center: May 9-10, 2017

North Carolina: Charlotte: Charlotte-Mecklenburg Police and Fire Training Academy: May 12-13, 2017

Massachusetts: Boston: Franklin Park Zoo Auditorium: Aug 15-16, 2017

Virginia: Fredericksburg: Rappahannock Regional Criminal Justice Academy: Aug 28-29, 2017

Virginia: Fredericksburg: Directive 83-1 Capture Systems Certification and Dart Projector Qualification Day: Aug 30, 2017

Texas: Dallas: Dallas Zoo Auditorium: Sept 11-12, 2017

Texas: Bastrop (SE Austin Area): M.D. Anderson Cancer Center: Sept 14-15, 2017

Florida: Kissimmee: Holiday Inn Orlando SW Celebration: Sept 20-21, 2017

Wisconsin: Stevens Point: University of Wisconsin-Stevens Point: Oct 21-22, 2017

Texas: San Antonio: Best Western Fiesta Inn: Dec 5-6, 2017

The most complete, up to date training available on Chemical Immobilization, presented in an easy to understand manner, applicable to all experience levels.

Learn Reliable, Safe, and Effective Techniques for the Species You Work With and the Scenarios You Encounter!

This is Real Training

We respect your time and your intelligence, and we know what it takes to be proficient in the field. Our course materials are time-tested to over 11,000 professionals on four continents.

You Get the Top Instructors

Hand picked Veterinarians and Biologists— Experts in Chemical Immobilization and Remote Delivery Anesthesia, and Outstanding Teachers as well!

You Get Training Materials that Work

Our presentation is multi-media and hands-on. You hear it in lecture, see it on video, and do it with your own hands. You will also take home a comprehensive 175-page training manual covering all course materials.

You Get What We Promise

Clear, concise information which will guide you to a safer, more successful level of expertise or we will refund your full tuition fee.

We do not sell equipment, nor do we have contracts with equipment manufacturers. We provide only education in Chemical Immobilization and field assistance, and our recommendations for drugs and equipment stem from practical field use.

This workshop is also approved for Veterinary Continuing Education Credit. Call for details.

All attendees receive the all new 175-page manual:

Chemical Immobilization of Animals: Technical Field Notes 2017

Certificates will be Awarded!

Our program has been presented since 1989, and is considered by US government agencies to be the standard in Chemical Immobilization training.

We have provided training to:

- Animal Rescue League of Boston
- Rappahannock Regional Criminal Justice Academy
- Essex County College Police Academy
- Greater Orlando Aviation Authority
- USDA Wildlife Services
- US Fish and Wildlife Service
- Beijing Biodiversity Center
- M.D. Anderson Cancer Center
- Alaska Dept. of Fish and Game
- Great Smoky Mountains National Park
- Florida Fish and Wildlife Conservation Commission
- Wisconsin Dept. of Natural Resources
- New York Division of Fish, Wildlife and Marine Resources
- And a multitude of others!

"Top quality,
hands on,
field tested,
practical
information"

Our Instructors Are Veterinarians, As Well As Elite Biologists, All Specializing In Remote Anesthesia

Internationally recognized experts, who are easy to talk to, welcome questions, and have the answers you need.

Mark Drew DVM: President and Diplomate of the American College of Zoological Medicine: Formerly Associate Professor Exotic Animal Medicine and Reproduction Texas A&M University. Currently State Wildlife Veterinarian Idaho Department of Fish & Game.

Ken Waldrup DVM, PhD: Post-Doctoral Fellow Invermay Agricultural Centre New Zealand-Farmed Deer Anesthesia/Reproduction/Wildlife Diseases: Currently Regional Zoonoses Control Veterinarian Texas Dept. of State Health Services.

Douglas Armstrong DVM: Director of Animal Health Henry Doorly Zoo and Aquarium: Over 25 years field experience in anesthesia of free ranging/captive species in the US, South Africa, Nepal, Russia, Indonesia, the United Arab Emirates, China, the Philippines and Thailand.

Curtis Eng DVM: Past Director of Health Services Los Angeles Zoo and Botanical Gardens, served as the Attending Veterinarian at the Primate Foundation of Arizona, and is currently a Clinical Associate Professor Western University of Health Sciences.

Kim DeLozier, Wildlife Biologist: Our Chemical Immobilization SWAT Specialist. Expertise in Night Vision/Thermal Imaging assisted capture. Previously with Great Smoky Mountains National Park and the Rocky Mountain Elk Foundation. Over 37 years of field experience in chemical capture, species reintroduction, and nuisance animal control.
